

⚠️ **Only for Claude premium users — free won't work, sadly.**

Aura-Slide

by Shafayat

Beautiful presentation slides for your thesis, project or class — made by Claude from your own files. No coding needed. Just follow the pictures.

WHAT YOU NEED

- **Your own laptop** with Windows 10 or 11 (university lab PCs usually block installs)
- A **Claude Pro** (or higher) account
- **Internet**, and about **3 GB** free space on drive C
- About **30 minutes** the first time. After that, only a few clicks.

THE STEPS

1. Download
2. Unzip
3. Start the setup
4. Let it install
5. Your Aura-Slide folder
6. Put your files in
7. Fill in the form
8. Trust the folder in VS Code
9. Sign in to Claude
10. Say the magic words

Download Aura-Slide

Project page: github.com/shafayatshihan/aura-slide-by-shafayat

1

Download Aura-Slide

Click the button. The download starts by itself.

Download Aura-Slide

1. Click **Download Aura-Slide** above. This PDF stays open.
2. Your browser saves **Aura-Slide-Setup.zip** in your **Downloads** folder.
3. If your browser asks **"Keep"** or **"Save"**, click it.

Button not working? Type this into your browser instead:

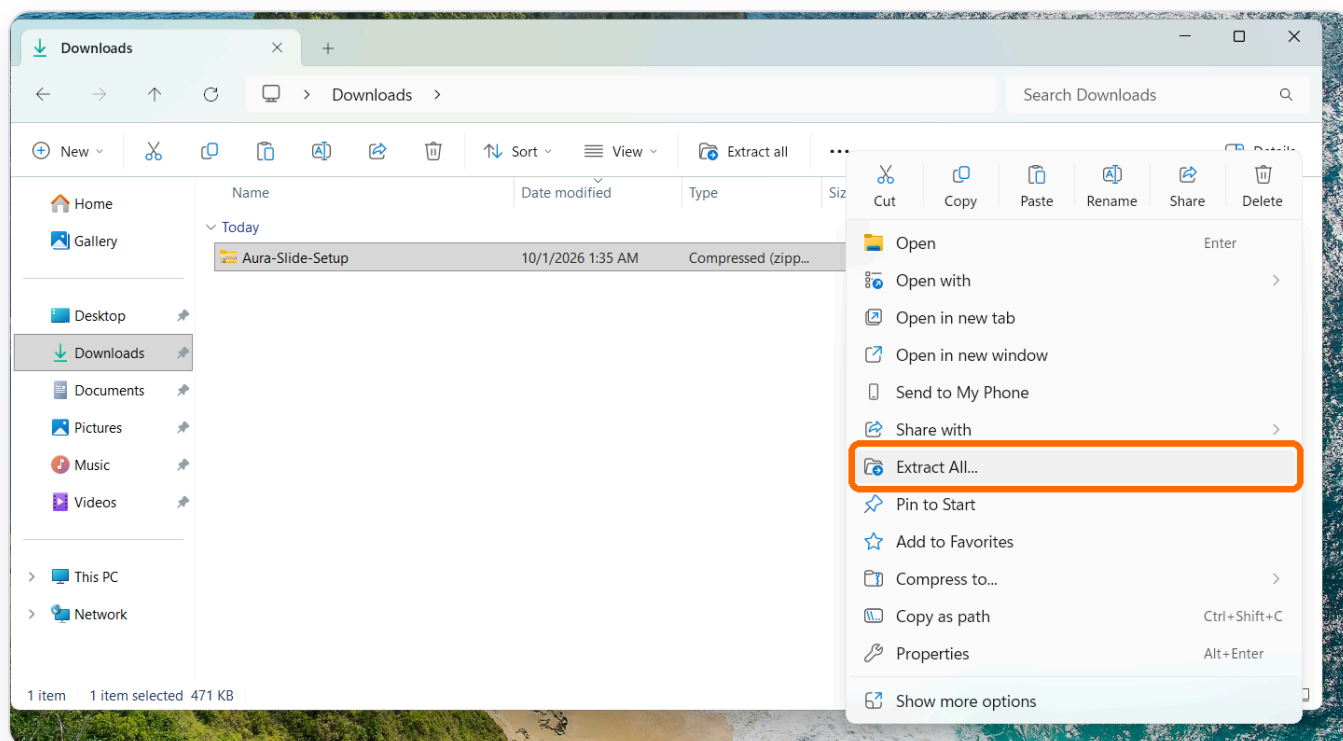

github.com/shafayatshihan/aura-slide-by-shafayat/releases/latest and click

Aura-Slide-Setup.zip.

Download it only from this page. Never run an Aura-Slide file someone sends you on WhatsApp or email.

Step 2 — Unzip it

Open your **Downloads** folder. **Right-click** the ZIP file and choose **Extract All...**

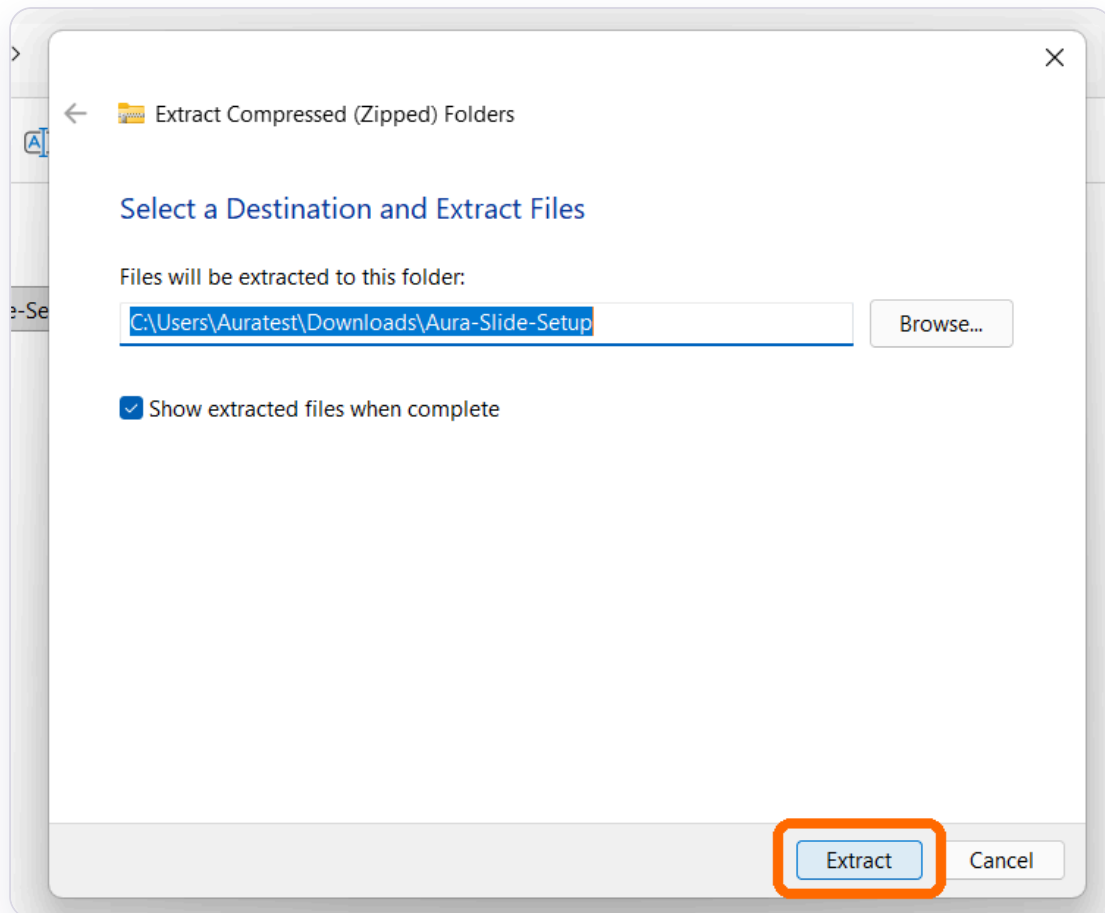

Right-click **Aura-Slide-Setup** → **Extract All...**

2

Unzip it (continued)

A small window opens. Just click **Extract**.

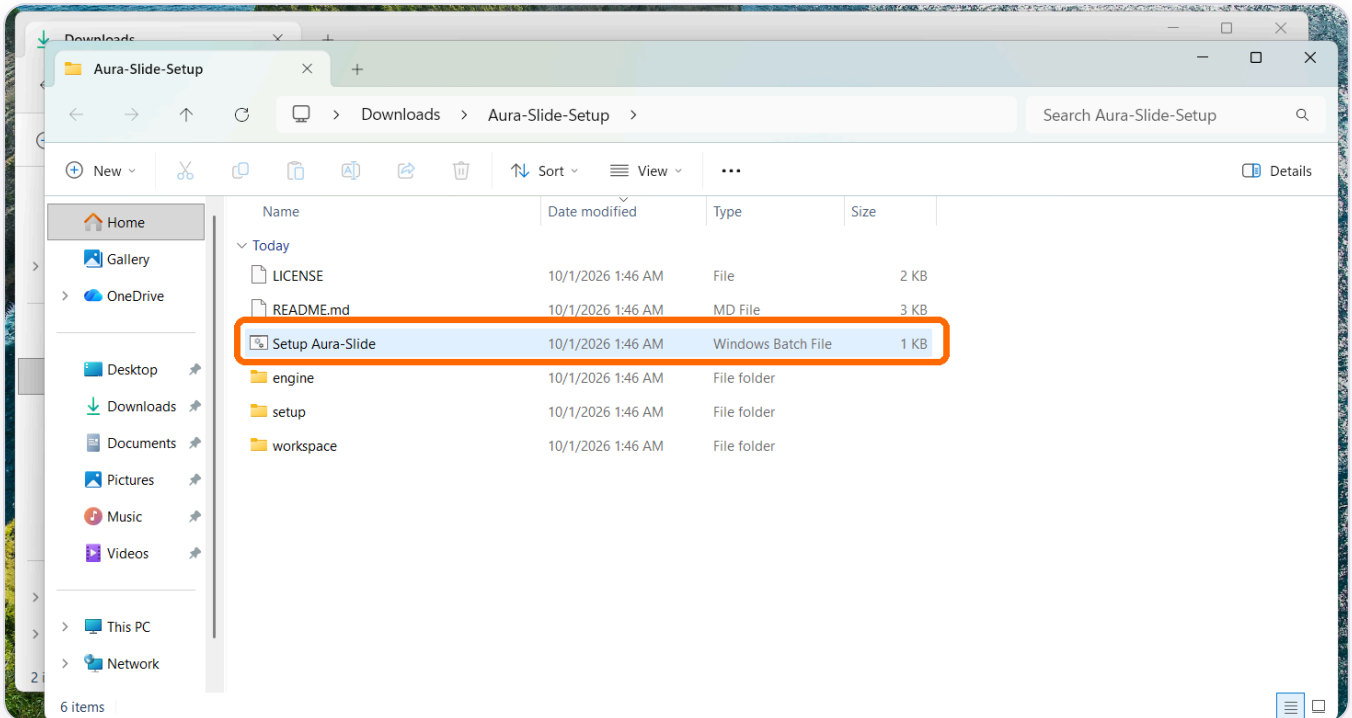

Click **Extract**. Do not change anything else.

Do not double-click files *inside* the ZIP without extracting first — it will not work.

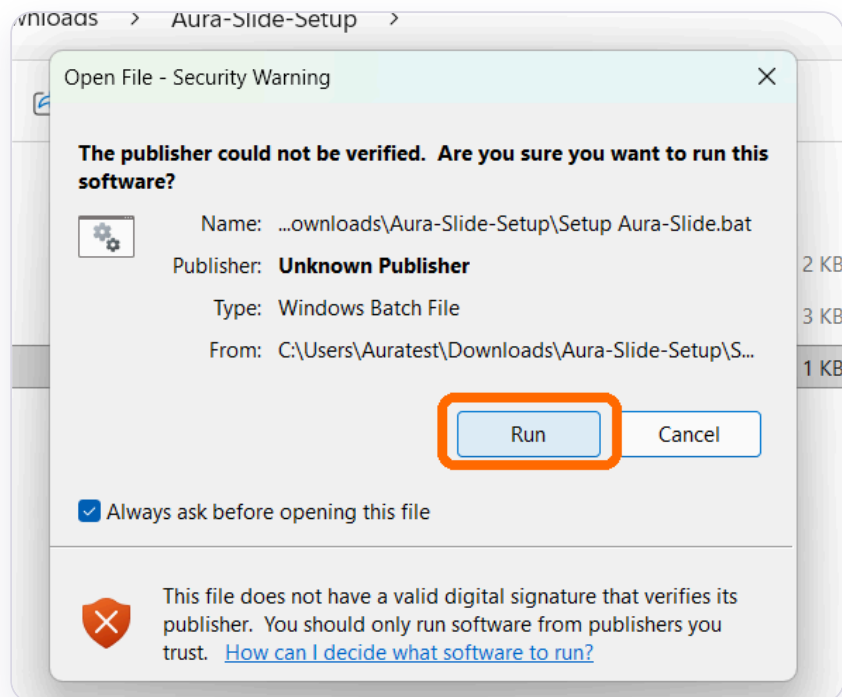

3

Start the setup

A new folder opens. Double-click **Setup Aura-Slide**.

Double-click **Setup Aura-Slide**.

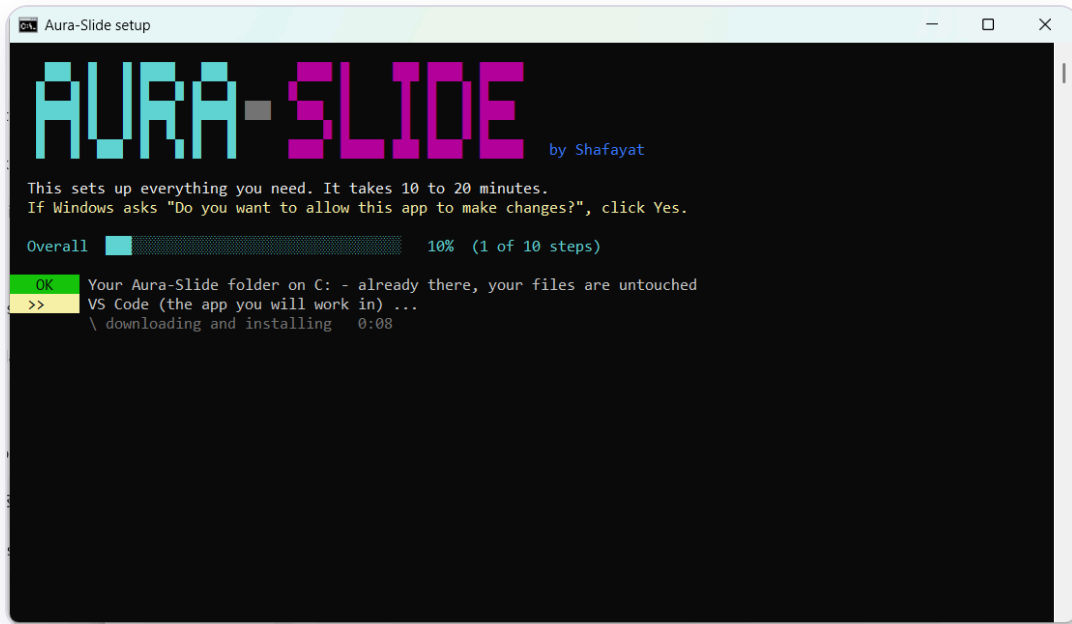

Windows asks if you are sure. Click **Run**.

If you see a blue box **"Windows protected your PC"** instead: click **More info**, then **Run anyway**.

4

Let it install

Setup installs everything by itself. It takes **10 to 20 minutes**.

Setup is working. The bar shows how far it is.

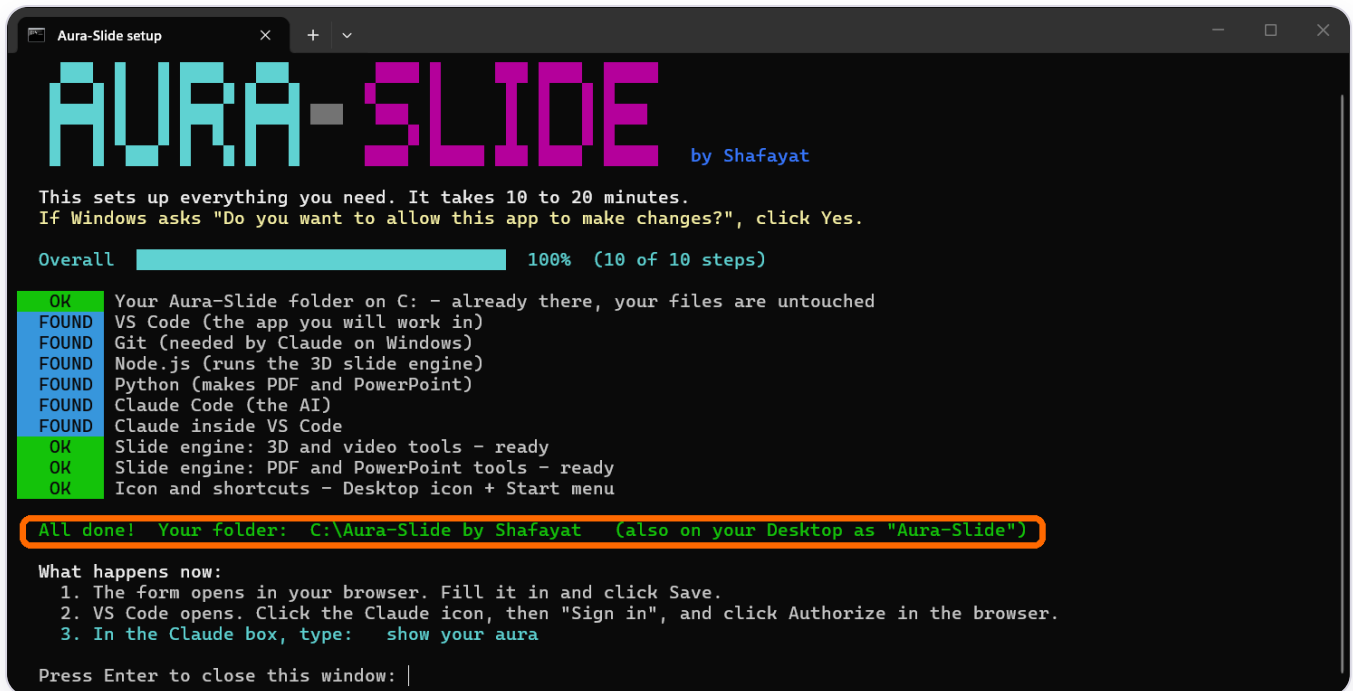

If the screen goes dark and asks **"Do you want to allow this app to make changes?"** — click **Yes**. It can ask a few times.

Some steps take several minutes. **Do not close the window.**

4

Let it install (finished)

Wait for the green **All done!** line.

```
Aura-Slide setup
X + v

AURA-SLIDE by Shafayat

This sets up everything you need. It takes 10 to 20 minutes.
If Windows asks "Do you want to allow this app to make changes?", click Yes.

Overall 100% (10 of 10 steps)

OK Your Aura-Slide folder on C: - already there, your files are untouched
FOUND VS Code (the app you will work in)
FOUND Git (needed by Claude on Windows)
FOUND Node.js (runs the 3D slide engine)
FOUND Python (makes PDF and PowerPoint)
FOUND Claude Code (the AI)
FOUND Claude inside VS Code
OK Slide engine: 3D and video tools - ready
OK Slide engine: PDF and PowerPoint tools - ready
OK Icon and shortcuts - Desktop icon + Start menu

All done! Your folder: C:\Aura-Slide by Shafayat (also on your Desktop as "Aura-Slide")

What happens now:
1. The form opens in your browser. Fill it in and click Save.
2. VS Code opens. Click the Claude icon, then "Sign in", and click Authorize in the browser.
3. In the Claude box, type: show your aura

Press Enter to close this window: |
```

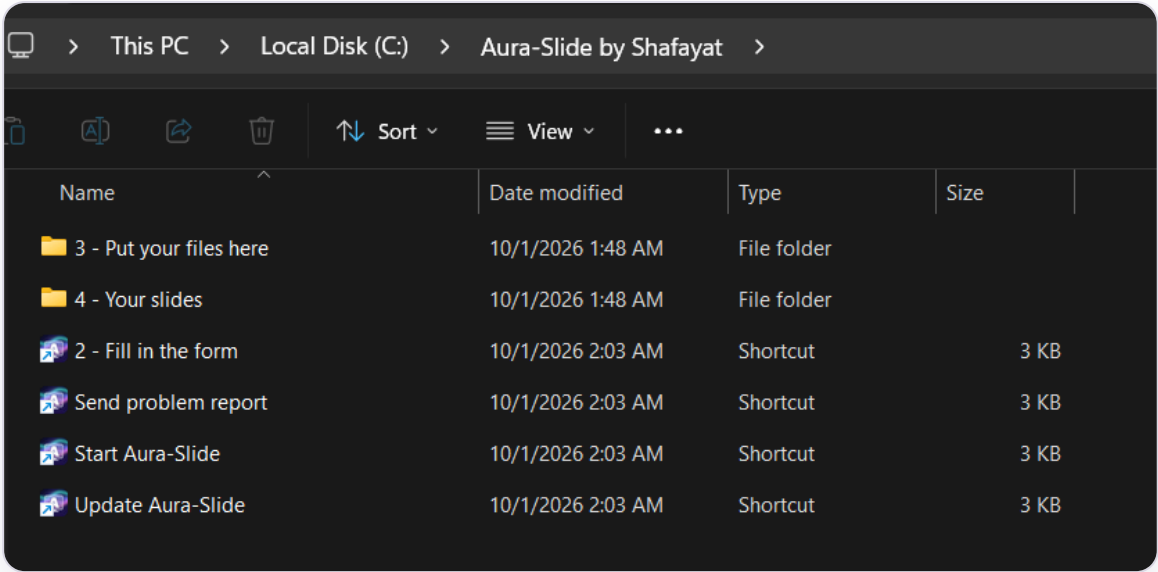

All done! Setup now opens the form and VS Code for you.

Red **FAIL** on a line? Run **Setup Aura-Slide** again — it continues where it stopped.

Your Aura-Slide folder

Setup made a folder on drive C: **C:\Aura-Slide by Shafayat**. You also get an **Aura-Slide** icon on your Desktop.

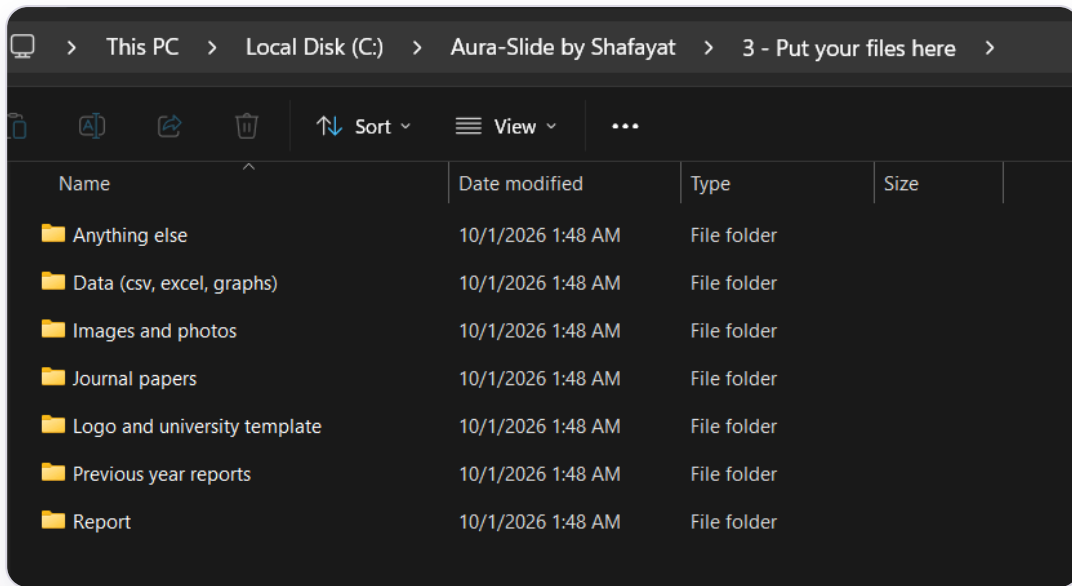

Everything you need is in this one folder.

3 - Put your files here	Your report, pictures and data go here
4 - Your slides	Your finished slides appear here
2 - Fill in the form	Tell Aura-Slide about your presentation
Start Aura-Slide	Opens VS Code, where you talk to Claude
Update Aura-Slide	Gets the newest version
Send problem report	Makes a file you can send to Shafayat if something breaks

Put your files in

Open **3 - Put your files here** and drag your files into the right folders.

Seven folders, one for each kind of file.

Report	Your thesis or project report (PDF or Word)
Images and photos	Photos of your setup, diagrams, screenshots
Data (csv, excel, graphs)	Your measurements, tables and charts
Logo and university template	Your university logo or slide template
Previous year reports	Older reports on the same topic
Journal papers	Papers you used
Anything else	Anything that does not fit above

Empty folders are fine. Claude only uses what you put here, and never changes or deletes your files.

7

Fill in the form

The form opens in your browser. Only **4 questions** are required. Skip the rest and Claude decides.

The screenshot shows a web form titled "Tell Aura-Slide about your presentation" with a subtext "Only 4 questions are required (marked *). Skip anything else and Claude will decide." The form is divided into steps, with "STEP 1" highlighted. The main question is "What kind of presentation is it?" with the instruction "Pick the closest one." Below this are eight buttons: "Thesis defence" (final-year or MSc/PhD), "Thesis progress" (interim or mid-term), "Project" (course or group project), "Class presentation" (assignment or topic talk), "Seminar" (department or research), "Conference talk" (paper presentation), "Proposal" (research or funding), and "Lecture" (for teachers). A "Something else" button is also present. Below the buttons is a text input field for "Title of your presentation *" with the example "Solar-powered drip irrigation for small farms" and a note "Example: Solar-powered water pump for rural irrigation". There is also a "Subtitle (optional)" field. At the bottom, it says "Step 1 of 10 · The basics" and has "Back" and "Next" buttons.

Step 1 of the form: pick the kind of presentation and write the title.

To open the form again later: double-click **2 - Fill in the form** in your Aura-Slide folder.

Fill in the form (continued)

In the **Your files** step, press **Check again** after adding files. At the end, press **Save**.

The screenshot shows the 'Your files' step of the Aura-Slide form. At the top, a header bar says 'Tell Aura-Slide about your presentation' with a sub-note 'Only 4 questions are required (marked *). Skip anything else and Claude will decide.' Below this is a progress bar with 10 steps, where the 6th step is highlighted. The main content area is titled 'STEP 6 Your files' and instructs the user to 'Put your report, pictures and data into the folders, then press **Check again**. Claude reads everything here.' There are two buttons: 'Open my files folder' and 'Check again'. Below these are four file categories, each with a list of files and a file count: 'Report' (1 file: 'Final report - Solar drip irrigation.pdf'), 'Images and photos' (2 files: 'field_setup.jpg', 'pump_closeup.jpg'), 'Data (csv, excel, graphs)' (1 file: 'flow_rates.csv'), and 'Logo and university template' (1 file: 'university_logo.png'). At the bottom, a progress indicator shows 'Step 6 of 10 - Your files' and two buttons: 'Back' and 'Next'.

Your files are listed. **Open my files folder** and **Check again** help you add more.

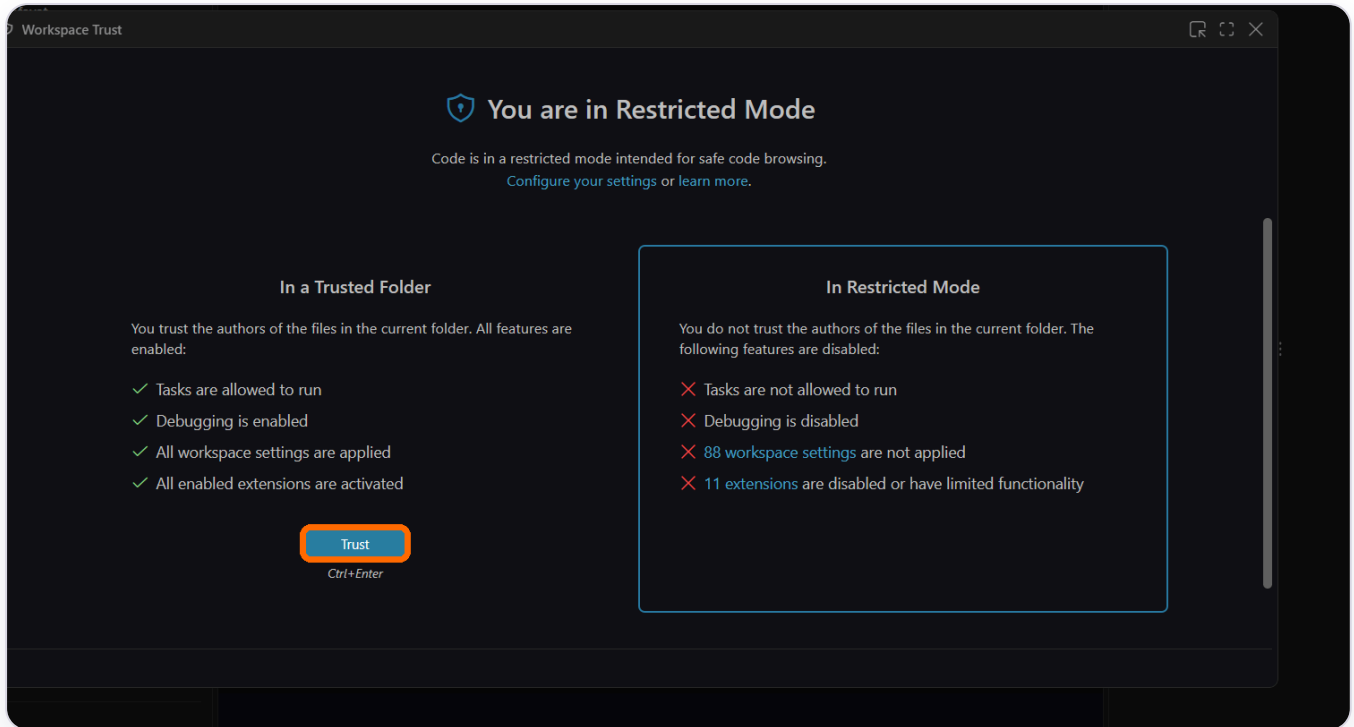

The screenshot shows a confirmation screen with a large orange star icon and the text 'Saved!'. Below this, it says 'Now go to **VS Code**, click the **Claude** icon, and type:'. There is a prominent button labeled 'show your aura'. At the bottom, it says 'Saved 2026-10-01 01:06 in your Aura-Slide folder.' and 'You can close this page. To change your answers later, open your Aura-Slide folder and double-click 2 - **Fill in the form**.'

Saved! Now go to VS Code.

Trust the folder in VS Code

VS Code opens by itself. (Later, open it with **Start Aura-Slide**.) The first time it asks whether you trust the folder.

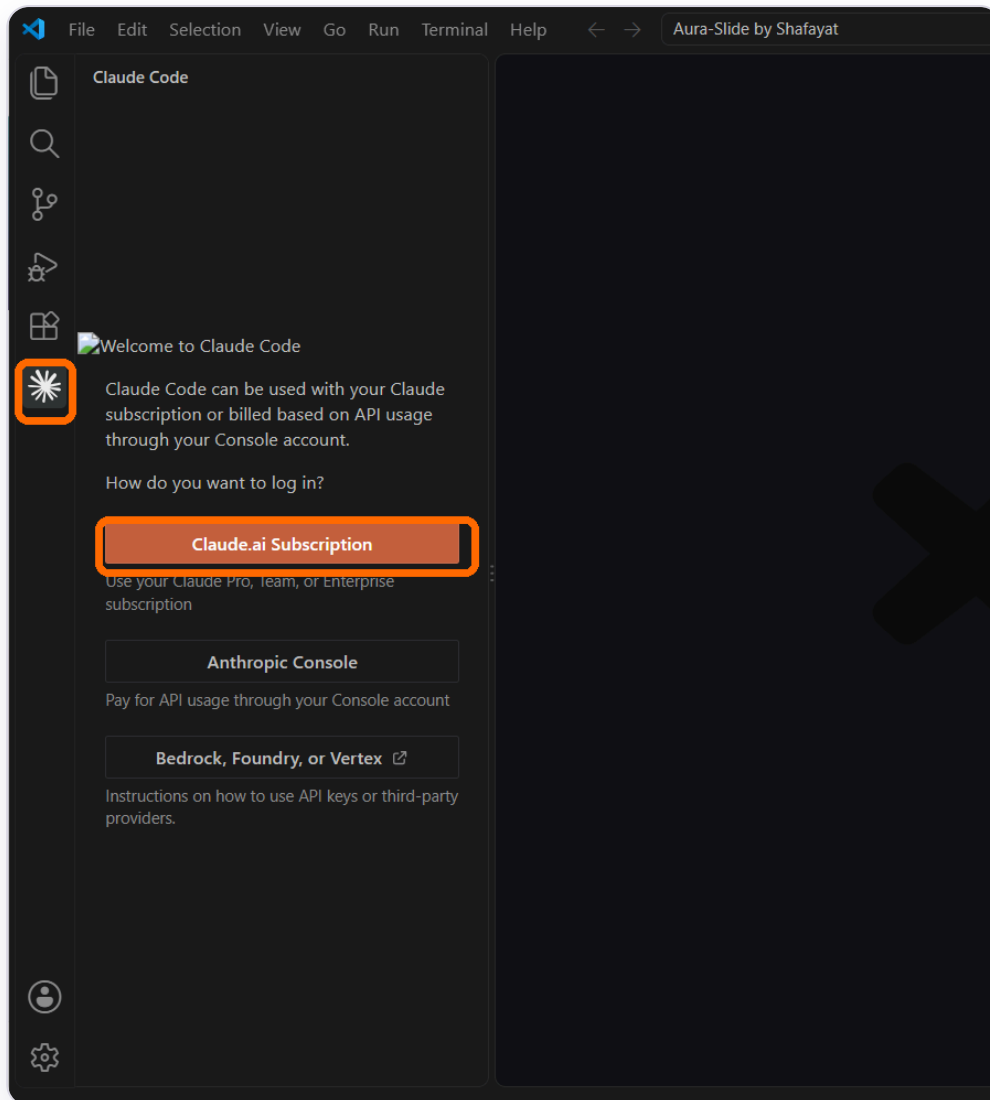

Click **Trust**. Without this, Claude cannot work.

If instead you see a question “**Do you trust the authors of the files in this folder?**”, click **Yes, I trust the authors**.

Sign in to Claude

First time only. Click the **Claude spark** icon on the left, then **Claude.ai Subscription**.

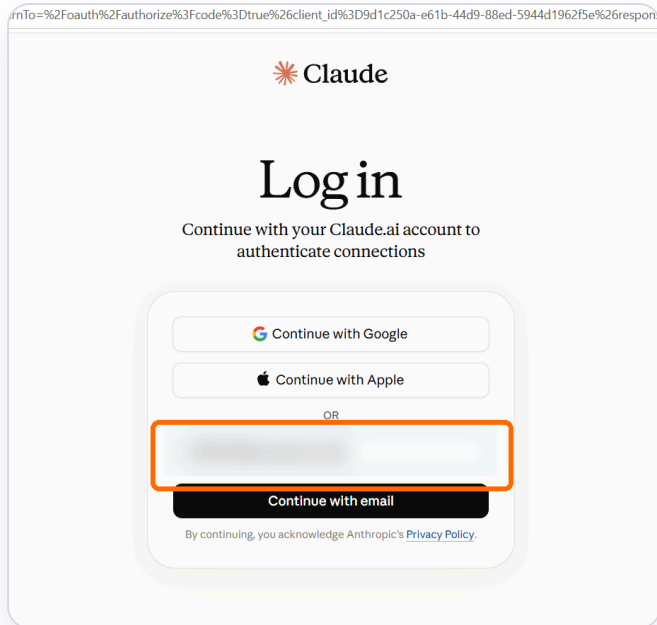

The orange-boxed spark icon opens Claude. Choose **Claude.ai Subscription**.

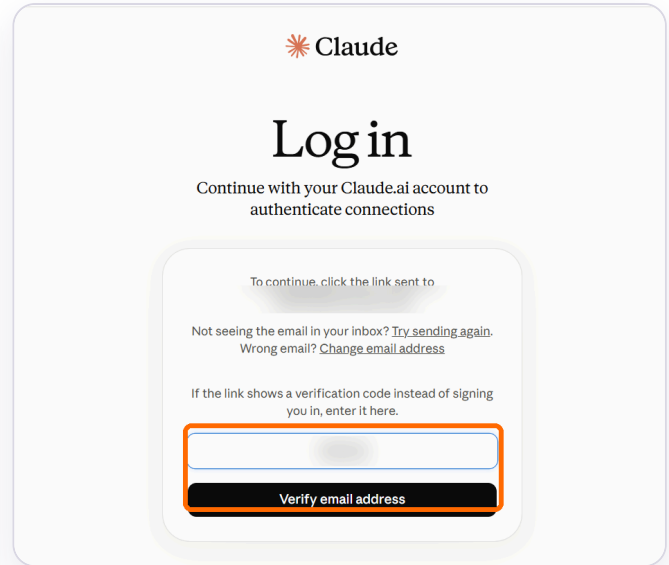

Sign in to Claude (continued)

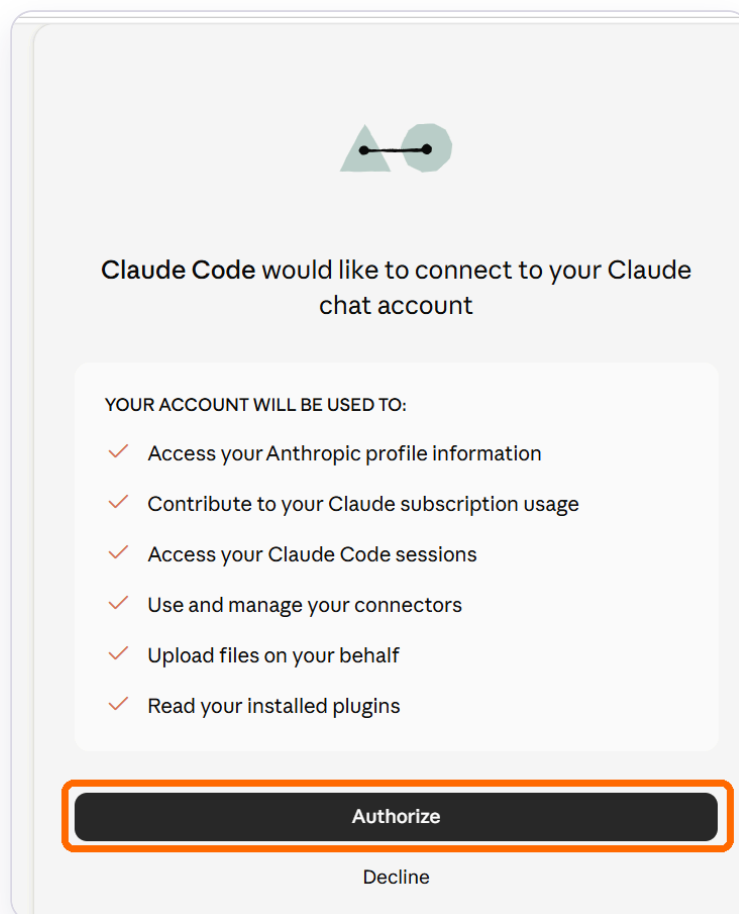

Your browser opens. Sign in with the account that has **Claude Pro**.

Sign in with Google, Apple or your email.

If you used email: type the code from your inbox.

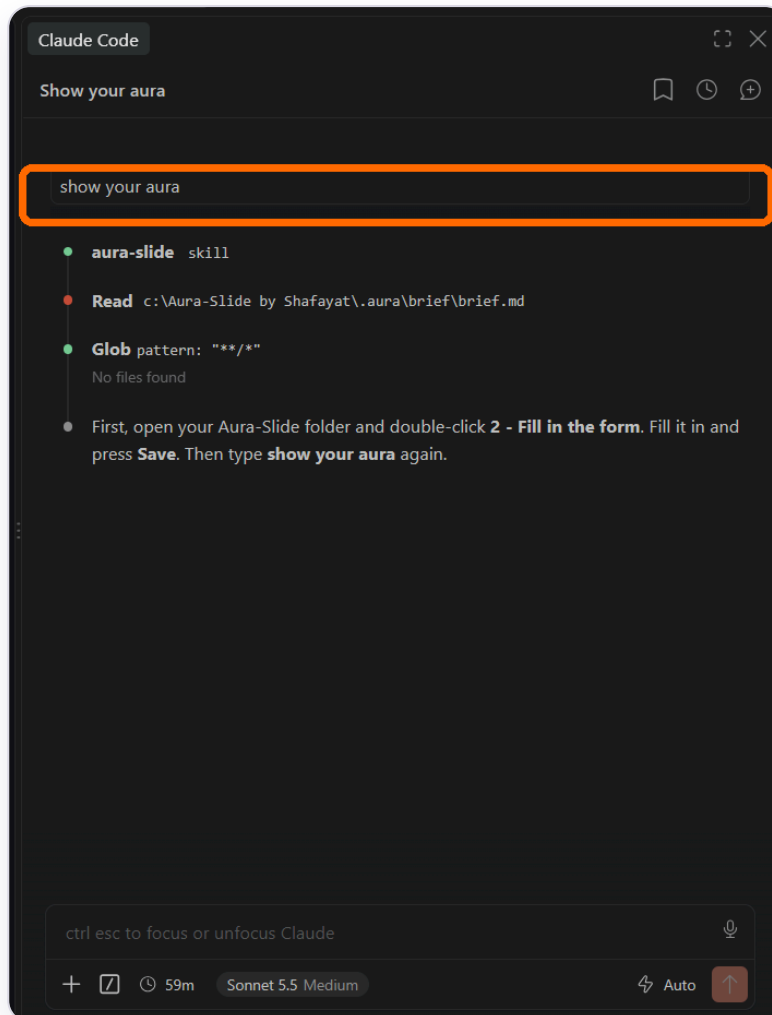

Click **Authorize**. Then go back to VS Code.

10

Say the magic words

In the Claude box at the bottom, type the words below and press **Enter**.

show your aura

Claude reads your answers and your files, then shows a summary. Reply **yes** if it is right.

If Claude says “**First, open your Aura-Slide folder and double-click 2 - Fill in the form**” (like in this picture), you have not saved the form yet. Do step 7, then type **show your aura** again.

Something went wrong?

Try these in order.

1. **Setup stopped or shows red FAIL** → double-click **Setup Aura-Slide** again. It skips what is already done.
2. **"App Installer is missing"** → the Microsoft Store opens. Click **Get** or **Update**, wait 5 minutes, run setup again.
3. **"No internet connection"** → connect to Wi-Fi and run setup again.
4. **"Only ... GB free on drive C"** → delete big files you do not need, empty the Recycle Bin, run setup again.
5. **Claude does not answer** → check that you clicked **Trust** (step 8) and signed in (step 9).
6. **Claude says your usage limit is reached** → that is your Claude plan. Wait a few hours and continue.
7. **Still stuck** → open your Aura-Slide folder, double-click **Send problem report**, and send the ZIP it puts on your Desktop to Shafayat.

Your files in **3 - Put your files here** are never changed, moved or deleted by Aura-Slide.
